ASSIGNMENT 3 : GUESSING GAME

```python
import random as r

print(" My Guessing Game")
print("Guess a number between 1 and 10!")
num = r.randint(1,10)

number_found = False

while not number_found:
        guess = input("Your guess: ")
        if not guess.isdigit():
                print("Please insert only numbers")
                continue

        guess = int(guess)
        if guess == num:
                print("Wow you guessed it!")
        number_found = True
        elif guess < num:
                print("too low")
        else:
                print("too high")
```
